New prices, expanded product range, and new services

Information on price adjustment

Dear Partner,

For more than ten years we have been your expert for linear LED lighting. Whatever your requirements, we have the product:

// __ developed for you,

// __ produced "Made in Austria",

// __ configured to the desired size,

// __ and tested for quality.

Rising raw material prices, the global shortage of raw materials in our industry, and the sharp increase in transport costs, have led to large cost increases. Some of these effects have been successfully mitigated by internal measures. This has enabled us to keep the price adjustment at a moderate level of 4.2%. This adjustment will apply from September 01, 2021 based on the current gross price list.

We will continue to be at your side as a reliable partner with a broad product range, customer-oriented service, and innovative solutions. We would be pleased if you would continue to project your LED solutions with us in the future.

It would be our pleasure to inform you personally about our products, our prices, and our services in order to find the optimal solution for your LED lighting together with you.

With kind regards

BILTON International GmbH
